

BIO HUMICARB

Colloidal Humic & Fulvic Acid

Contains Non-Plant Food Ingredients

Humic Acid (colloidal suspension)	4.00%
Fulvic Acid (colloidal suspension)	2.16%
Complexed Carbon (colloidal suspension)	4.00%

Shake Well Before Use. Keep out of children's reach.

When Using BioGreen's BIO HUMICARB Humic & Fulvic Acid

Bio HumiCarb is not compatible with liquid fertilizers containing Phosphorus or Calcium and will form a precipitate if mixed with them. Always perform a jar test.

Instructions for Use

Foliar Spraying: Use 1/2 gallon per 100 gallons of water every two to four weeks during the growing season. *Do not use more than recommended rates; excessive use rates may stunt plant growth.*

Instructions for Use On Turf, Greens, Tees or Fairways. *This material will not plug USGA Sand Greens.*

Application Rate per acre. Use 1/2 gallon per acre or apply 1.5 oz. per 1000 sq.ft. in 1 to 5 gallons of water as a carrier.

Instructions for Use On Turf, Greens, Tees or Fairways. Yearly Program: Apply 1.5 oz per 1000 sq.ft starting late winter or early spring followed up with monthly applications for remainder of season. **NOTE:** Water in to incorporate after application.
