

BIOWET

Organic Wetting Agent

*Shake Well Before Use
Keep Out of Children's Reach*

Contains Non-Plant Food Ingredients

Destrose	96.16%
Bio HumiCarb	1.92%
BioBasic	1.92%

A natural wetting agent consisting of plant derived sugars, humic and fulvic acids. Unlike standard wetting agents, which are alcohol based or soaps, BIO-WET contains neither alcohol nor soaps.

INSTRUCTIONS for USE: Mix 16 to 32 ounces per 100 gallons of spray solution. When mixing with other products or materials, BioWet should be added to to spray tank first.

COMPATIBILITY: BioWet is compatible with most all products or materials. Perform a jar test to assure compatibility.

STORAGE: When stored, beneficial micro-flora, such as mycorrhizae and other organisms often grow in the container to form a mass at the top surface of the solution. This growth mass can be added to spray tanks or used to inoculate compost materials.

NOTE: FREEZING will not damage this product but should be avoided to prevent possible bursting of the container.

Mfg. Bio-Green LLC (847) 740 9637
